Résumé

JAKE SAWYER
jake@verify.design

FOR YOUR CONSIDERATION
Jake Sawyer Designs and Codes Apps, Games, Websites, and More!

Howdy! Nothing gets me more excited than working together with brilliant people to create next-generation experiences via apps and games. I love building engaging interactions through mockups, rapidly iterated prototypes, and native code. I value user experience above all, and try to make interactions fun!

Keeping up to date with technology and design patterns is one of my passions. New and different input methods like touches, drawing stylii, and world-tracked devices inspire me to reimagine how we interact with apps and the world.

I'm also a giant goofball.

HIRE

ASSORTED SOFTWARE
Recent Projects

Jar Wars
Networked multiplayer VR game designed for 2v2 battles

Internal Ember Apps
Mocked up and iterated prototype UI / flows to a large staging app

Looty Dungeon
A "Best of 2016" iOS dungeon crawler, smooth responsive UI for all devices

Forge
A "Best of 2015" iPad sketching app, iterated new gestural interactions

DESIGN AND CODE
Recent Roles

Taco Illuminati
Co-founder, iOS / VR game, web, and monetization dev

Magento
Prototyped and implemented large Ember.js apps, simplified flows

Owlchemy Labs, FarBridge
Designed virtual spaces and interactions for VR games in Unity

Adobe, Adonit
UX mockups/prototypes, engineered professional drawing tools for iPads

AREAS OF EXPERTISE
Languages and Programs

Strong experience

Unity3D · HTML, CSS, JS · C# · Sketch · Adobe CC · Communication · Prototyping · Git Tower · HTC Vive

Intermediate experience

Swift · Objective-C · Xcode · Ember.js · Photon

Improving experience, eager to learn more

Metal · ARKit · SpriteKit · SceneKit · Integration Tests

I'm a quick learner — let's make something awesome!
